- Adult & Child Bag-Mask Technique and Rescue Breathing
- Adult & Children 2-rescuer CPR
- Automated External Defibrillator
- CPR for Infants
- Relief of Choking
- Victim & Rescuer Safety
- The Chain of Survival

**Cost: \$50/ Person**

*(textbook available for \$12)*

**CLASSES HELD MONTHLY**

Sudden cardiac arrest (SCA) is the leading cause of death in the United States and Canada. Although estimates of the annual number of deaths due to out-of-hospital SCA vary widely, data from the Centers for Disease Control and Prevention estimates that in the United States approximately 330,000 people die annually from coronary heart disease before reaching a hospital or in the emergency room (an approximation of out-of-hospital SCA). About 250,000 of those deaths occur in the out-of-hospital setting.
